                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            /uev_bruge="Adult Worms"
//lab host="Mouse and rabbit"
//clone lib="Adult $jC 7/94"
//note="vector: Lambda ZaP-II XR.; Site 1: EcoR I; Site 2:
Xhol I; Several hundred adult Schistosoma japonicum
(Anhui, P.R. China, strain), of mixed sex, were perfused
from the mesenteries of experimentally infected mice and
rabbits at the Queensland Institute of Medical Research,
Brisbane, Australia (QIMR), and stored for several months
in liquid nitrogen. Subsequently, mRNA was isolated at the
QIMR from lysates of these worms by oligo dT
chromatography, using a kit from Pharmacia. The mRNA was
then shipped to Clontech, Palo Alto, CA, USA, who
constructed a cDNA library. First strand synthesis was
primed with an oligo-dT-Xho1-primer and synthesis was
accomplished with RNAse H and T4 DNA polymerase. The
double stranded cDNA was ligated to EcoRI linkers,
digested with EcoRI and XhoI, and ligated into the
phagemid vector lambda ZAP II XR. After construction of
this directional library by Clontech, it was returned to
the QIMR. During analysis of the library at the QIMR, we
have found that small percentage, 2% to 3%, of the
clones contain inserts that appear to be highly homologous
to sequences from salmonoid fishes, as determined by
homology comparisons using BLAST and by Southern
hybridization analysis to genomic DNA from salmon (Sigma
Chemical Co., St. Louis, MO) under stringent washing
conditions. The remainder of the clones appear to contain
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            86-21-50801922
